CONTENTS

VOLUME 106 · NUMBER 1 · JULY 1995

1 CRAIG A. DOUPNIK, NANCY F. LIM, PAULO KOFUJI, NORMAN DAVIDSON, and HENRY A. LESTER. Intrinsic gating properties of a cloned G protein-activated inward rectifier K^+ channel

25 WEN-HUI WANG. Regulation of the hyperpolarization-activated K^+ channel in the lateral membrane of the cortical collecting duct

45 X. HAN, Y. SHIMONI, and W. R. GILES. A cellular mechanism for nitric oxide-mediated cholinergic control of mammalian heart rate

67 MARC B. LANDE, JOANNE M. DONOVAN, and MARK L. ZEIDEL. The relationship between membrane fluidity and permeabilities to water, solutes, ammonia, and protons

85 NICOLAS DEMAUREX, JOHN ORLOWSKI, GUY BRISSEAU, MICHAEL WOODSIDE, and SERGIO GRINSTEIN. The mammalian Na^+/H^+ antiporters NHE-1, NHE-2, and NHE-3 are electroneutral and voltage independent, but can couple to an H^+ conductance

113 DAVID J. MACONOCHIE and JOE HENRY STEINBACH. Block by acetylcholine of mouse muscle nicotinic receptors, stably expressed in fibroblasts

VOLUME 106 · NUMBER 2 · AUGUST 1995

149 ROBERT SABOVCIK, JINQING LI, PAVEL KUCERA, and BLAISE PROD'HOM. Permeation properties of a Ca^{2+}-blockable monovalent cation channel in the ectoderm of the chick embryo: pore size and multioccupancy probed with organic cations and Ca^{2+}

175 SARKIS P. KASPAR and DIETER J. PELZER. Modulation by stimulation rate of basal and cAMP-elevated Ca^{2+} channel current in guinea pig ventricular cardiomyocytes

203 ISABELLE FAVRE, EDWARD MOCZYDLOWSKI, and LAURENT SCHILD. Specificity for block by saxitoxin and divalent cations at a residue which determines sensitivity of sodium channel subtypes to guanidinium toxins

231 PAMELA A. PAPPONE and SHERWIN C. LEE. α-Adrenergic stimulation activates a calcium-sensitive chloride current in brown fat cells

259 PAUL C. PAPE, DE-SHIEN JONG, and W. KNOX CHANDLER. Calcium release and its voltage dependence in frog cut muscle fibers equilibrated with 20 mM EGTA

337 DE-SHIEN JONG, PAUL C. PAPE, S. M. BAYLOR, and W. KNOX

CHANDLER. Calcium inactivation of calcium release in frog cut muscle fibers that contain millimolar EGTA or Fura-2

VOLUME 106 · NUMBER 3 · SEPTEMBER 1995

393 H. CRISS HARTZELL, YOSHIYUKI HIRAYAMA, and JÉRÔME PETIT-JACQUES. Effects of protein phosphatase and kinase inhibitors on the cardiac L-type Ca current suggest two sites are phosphorylated by protein kinase A and another protein kinase

415 PAUL E. ROSS and MICHAEL D. CAHALAN. Ca^{2+} influx pathways mediated by swelling or stores depletion in mouse thymocytes

445 ISKANDER I. ISMAILOV, BAKHRAM K. BERDIEV, and DALE J. BENOS. Regulation by Na^+ and Ca^{2+} of renal epithelial Na^+ channels reconstituted into planar lipid bilayers

467 M. E. KARGACIN and G. J. KARGACIN. Direct measurement of Ca^{2+} uptake and release by the sarcoplasmic reticulum of saponin permeabilized isolated smooth muscle cells

485 LAWRENCE W. HAYNES. Permeation of internal and external monovalent cations through the catfish cone photoreceptor cGMP-gated channel

507 LAWRENCE W. HAYNES. Permeation and block by internal and external divalent cations of the catfish cone photoreceptor cGMP-gated channel

525 PATRICK DE SMET, JEANNINE SIMAELS, PETER E. DECLERCQ, and WILLY VAN DRIESSCHE. Regulatory volume decrease in cultured kidney cells (A6): Role of amino acids

543 M. CARTER CORNWALL, H. R. MATTHEWS, ROSALIE K. CROUCH, and GORDON L. FAIN. Bleached pigment activates transduction in salamander cones

559 MARIO VASSALLE, HANGANG YU, and IRA S. COHEN. The pacemaker current in cardiac Purkinje myocytes

VOLUME 106 · NUMBER 4 · OCTOBER 1995

583 WOLFGANG SCHREINER, FRIEDERIKE NEUMANN, MARTIN NEUMANN, ADELHEID END, SUSANNE M. ROEDLER, and SEYEDHOSSEIN AHARIN JAD. The influence of optimization target selection on the structure of arterial tree models generated by constrained constructive optimization

601 DOROTHY A. HANCK and MICHAEL F. SHEETS. Modification of inactivation in cardiac sodium channels: Ionic current studies with anthopleurin-A toxin

617 MICHAEL F. SHEETS and DOROTHY A. HANCK. Voltage-dependent open-state inactivation of cardiac sodium channels: Gating current studies with Anthopleurin-A toxin

641 MICHAEL E. O'LEARY, LI-QIONG CHEN, ROLAND G. KALLEN, and RICHARD

HORN. A molecular link between activation and inactivation of sodium channels

659 DE-SHIEN JONG, PAUL C. PAPE, and W. KNOX CHANDLER. Effect of sarcoplasmic reticulum calcium depletion on intramembranous charge movement in frog cut muscle fibers

705 ALBERTINO BIGIANI and STEPHEN D. ROPER. Estimation of the junctional resistance between electrically coupled receptor cells in *Necturus* taste buds

727 WENHUI WANG and MING LU. Effect of arachidonic acid on activity of the apical K^+ channel in the thick ascending limb of the rat kidney

745 THOMAS E. DECOURSEY. Mechanism of K^+ channel block by verapamil and related compounds in rat alveolar epithelial cells

VOLUME 106 · NUMBER 5 · NOVEMBER 1995

783 GRIGORY B. MELIKYAN, WALTER D. NILES, and FREDRIC S. COHEN. The fusion kinetics of influenza hemagglutinin expressing cells to planar bilayer membranes is affected by HA density and host cell surface

803 GRIGORY B. MELIKYAN, WALTER D. NILES, VLADIMIR A. RATINOV, MILOSH KARHANEK, JOSHUA ZIMMERBERG, and FREDRIC S. COHEN. Comparison of transient and successful fusion pores connecting influenza hemagglutinin expressing cells to planar membranes

821 EMILIA M. HOGAN, MATTHEW A. COHEN, and WALTER F. BORON. K^+- and HCO_3^--dependent acid–base transport in squid giant axons I. Base efflux

845 EMILIA M. HOGAN, MATTHEW A. COHEN, and WALTER F. BORON. K^+- and HCO_3^--dependent acid–base transport in squid giant axons II. Base influx

863 Y. KOUTALOS, K. NAKATANI, T. TAMURA, and K.-W. YAU. Characterization of guanylate cyclase activity in single retinal rod outer segments

891 Y. KOUTALOS, K. NAKATANI, and K.-W. YAU. The cGMP-phosphodiesterase and its contribution to sensitivity regulation in retinal rods

923 A. N. LOPATIN, E. N. MAKHINA, and C. G. NICHOLS. The mechanism of inward rectification of potassium channels: "Long-pore plugging" by cytoplasmic polyamines

957 KATHRYN H. MYBURGH, KATHLEEN FRANKS-SKIBA, and ROGER COOKE. Nucle-otide turnover rate measured in fully relaxed rabbit skeletal muscle myofibrils

975 CHRIS MATHES and STUART H. THOMPSON. The relationship between depletion of intracellular Ca^{2+} stores and activation of Ca^{2+} current by muscarinic receptors in neuroblastoma cells

995 J. Gao, R. T. Mathias, I. S. Cohen, and G. J. Baldo. Two functionally different Na/K pumps in cardiac ventricular myocytes

1031 Dorothea Y. Sanchez and Andrew L. Blatz. Block of neuronal chloride channels by tetraethylammonium ion derivatives

VOLUME 106 · NUMBER 6 · DECEMBER 1995

1047 Fred J. Sigworth. *Commentary.* Charge movement in the sodium channel

1053 Birgit Hirschberg, Arthur Rovner, Mitchell Lieberman, and Joseph Patlak. Transfer of twelve charges is needed to open skeletal muscle Na^+ channels

1069 R. S. Hurst, R. Latorre, L. Toro, and E. Stefani. External barium block of *Shaker Potassium Channels*: Evidence for two binding sites

1089 Ward M. Peterson and Sheldon S. Miller. Identification and functional characterization of a dual gaba/taurine transporter in the bullfrog retinal pigment epithelium

1123 Masato Konishi and Masaru Watanabe. Resting cytoplasmic-free Ca^{2+} concentration in frog skeletal muscle measured with fura-2 conjugated to high molecular weight dextran

1151 Siân A. Rees, Jamie I. Vandenberg, Anthony R. Wright, Atsuya Yoshida, and Trevor Powell. Cell swelling has differential effects on the rapid and slow components of delayed rectifier potassium current in guinea pig cardiac myocytes

1171 H. Bradley Nuss, Nipavan Chiamvimonvat, M. Teresa Pérez-García, Gordon F. Tomaselli, and Eduardo Marbán. Functional association of the β_1 subunit with human cardiac (hH1) and rat skeletal muscle (μ1) sodium channel α subunits expressed in *Xenopus* oocytes

1193 H. Bradley Nuss, Gordon F. Tomaselli, and Eduardo Marbán. Cardiac sodium channels (hH1) are intrinsically more sensitive to block by lidocaine than are skeletal muscle (μ1) channels

1211 S. Nakayama and A. F. Brading. Interaction of Ca^{2+} agonist and depolarization on Ca^{2+} channel current in guinea pig detrusor cells

1225 Hong Zhao and Shmuel Muallem. Na^+, K^+, and Cl^- transport in resting pancreatic acinar cells

1243 Hong Zhao and Shmuel Muallem. Agonist-specific regulation of $[Na^+]_i$ in pancreatic acinar cells

1265 Author Index to Volume 106

1*a*–48*a* Abstracts of Papers Presented at the Forty-Ninth Annual Meeting of the Society of General Physiologists
